

TechNews-> Test Case Report

Test Case ID	Test Scenario	Test Steps	Expected Result
TC-001	Verify Tech News Dashboard loads successfully	Open the Tech News Dashboard	Dashboard loads and displays the Tech News heading, topic buttons, and news articles
TC-002	Verify AI topic button	Click the AI button	AI-related news should be displayed
TC-003	Verify JavaScript topic button	Click the JavaScript button	JavaScript-related news should be displayed
TC-004	Verify Startup topic button	Click the Startup button	Startup-related news should be displayed
TC-005	Verify Programming topic button	Click the Programming button	Programming-related news should be displayed
TC-006	Verify article Read link	Click the Read link of an article	The selected article should open in a new browser tab
TC-007	Verify infinite scrolling	Scroll to the bottom of the news list	More news should load automatically
TC-008	Verify loading message during additional news loading	Scroll to the bottom of the news list	Loading more news... should appear while additional news is being loaded
TC-009	Verify article information display	Open the Tech News Dashboard and view an article	The article should display its title, author, and points
TC-010	Verify article points display	Open an article listing and check the Points value	The Points value should be displayed as a number
TC-011	Verify article author display	Open the Tech News Dashboard and view an article	The author's name should be displayed in the article information
TC-012	Verify Read link visibility	Open the Tech News Dashboard and view an article	The Read link should be clearly visible and distinguishable from other article information
TC-013	Verify switching between topics	Click AI, then JavaScript, and observe the news list	The news list should update according to the selected topic
TC-014	Verify rapid topic switching	Click Programming and then quickly click Startup	The news list should ultimately display the selected Startup topic
TC-015	Verify news loading after page refresh	Refresh the Tech News Dashboard	The dashboard should load news automatically after refresh
TC-016	Verify news content after selecting AI	Click the AI button and observe the displayed articles	The displayed articles should contain AI-related news
TC-017	Verify news content after selecting JavaScript	Click the JavaScript button and observe the displayed articles	The displayed articles should contain JavaScript-related news

TC-018	Verify news content after selecting Startup	Click the Startup button and observe the displayed articles	The displayed articles should contain Startup-related news
TC-019	Verify news content after selecting Programming	Click the Programming button and observe the displayed articles	The displayed articles should contain Programming-related news
TC-020	Verify article title display	Open the Tech News Dashboard and view the news list	Each news article should display a title
TC-021	Verify Read link appearance	Open the Tech News Dashboard and view an article	The Read link should be clearly visible and appear clickable
TC-022	Verify responsive layout on smaller screen	Resize the browser window to a smaller width and observe the dashboard	The dashboard content should remain properly arranged without horizontal scrolling or cutoff
TC-023	Verify AI topic on smaller screen	Resize the browser window to a smaller width and click the AI button	AI-related news should display properly without layout issues
TC-024	Verify JavaScript topic on smaller screen	Resize the browser window to a smaller width and click the JavaScript button	JavaScript-related news should display properly without layout issues
TC-025	Verify Startup topic on smaller screen	Resize the browser window to a smaller width and click the Startup button	Startup-related news should display properly without layout issues
TC-026	Verify Programming topic on smaller screen	Resize the browser window to a smaller width and click the Programming button	Programming-related news should display properly without layout issues
TC-027	Verify news list after topic selection	Click any topic button and observe the news list	The news list should remain visible after the selected topic loads
TC-028	Verify news list after page refresh	Refresh the dashboard page and observe the news list	The news list should load automatically after refresh
TC-029	Verify loading indicator during infinite scroll	Scroll to the bottom of the news list	The "Loading more news..." message should appear while more news is loading
TC-030	Verify additional news loading after scrolling	Scroll to the bottom of the news list again after additional articles have loaded	More news should load and the loading message should appear during the process

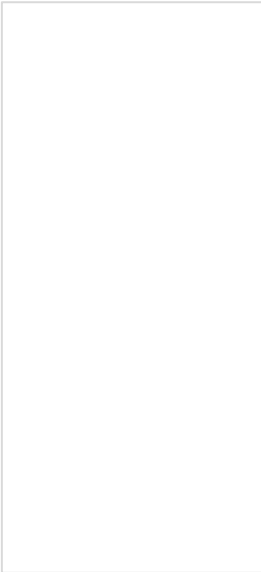

Actual Result	Status	Remarks
Dashboard loaded successfully with heading, topic buttons, and news articles displayed	PASS	Basic page load verified
AI-related news displayed successfully	PASS	Topic selection verified
JavaScript-related news displayed successfully	PASS	Topic selection verified
Startup-related news displayed successfully	PASS	Topic selection verified
Programming-related news displayed successfully	PASS	Topic selection verified
The article opened successfully in a separate tab	PASS	Navigation verified
Additional news loaded automatically on scrolling	PASS	Infinite scroll verified
The loading message appeared while additional news was loading	PASS	Loading behavior verified
The article displayed its title, author, and points correctly	PASS	Article information verified
The Points value was displayed as a number	PASS	Points display verified
The author's name was displayed correctly	PASS	Author display verified
The Read link was clearly visible and distinguishable	PASS	UI element visibility verified
The news list updated correctly when switching from AI to JavaScript	PASS	Topic switching verified
The Startup news was displayed correctly after switching quickly from Programming	PASS	Rapid topic switching verified
News loaded automatically after refreshing the dashboard	PASS	Page refresh behavior verified
The displayed articles were AI-related	PASS	Content relevance verified
The displayed articles were JavaScript-related	PASS	Content relevance verified

The displayed articles were Startup-related	PASS	Content relevance verified
The displayed articles were Programming-related	PASS	Content relevance verified
The news articles displayed titles correctly	PASS	Title display verified
The Read link was clearly visible and appeared clickable	PASS	Read link UI verified
The dashboard remained properly arranged without horizontal scrolling or cutoff	PASS	Responsive behavior verified
AI-related news displayed properly on the smaller screen	PASS	Responsive topic behavior verified
JavaScript-related news displayed properly on the smaller screen	PASS	Responsive topic behavior verified
Startup-related news displayed properly on the smaller screen	PASS	Responsive topic behavior verified
Programming-related news displayed properly on the smaller screen	PASS	Responsive topic behavior verified
The news list remained visible after topic selection	PASS	News list visibility verified
The news list loaded automatically after refresh	PASS	Refresh behavior verified
The "Loading more news..." message appeared during additional news loading	PASS	Loading indicator verified
Additional news loaded successfully and the loading message appeared during loading	PASS	Infinite scroll behavior verified

TechNews-> Test Summary Report

METRIC	RESULT
Total Test Cases	30
Passed	30
Failed	0
Needs Review	0
Confirmed Defects	0

QA Conclusion	30 test cases were executed and all 30 passed successfully. No confirmed defects were identified during the testing cycle. The Tech News Dashboard met the tested functional, navigation, loading, and responsive behavior requirements.
